THE SAFETY PIN.
FOR GENTLEMEN'S COLLARS AND TIES.
An evolution of the ordinary household Pin.

Bronze pins have been found in the lake-dwellings of Switzerland, while others have been discovered in Egypt with gold or amber heads. The pin head apparently always presented a difficulty and sometimes consisted of a loose ring passed through the eye. Specimens of Safety pins of a pre-historic period have also been found, proving that even this form of fastening is no novelty.

The importation of pins into England was strictly forbidden in 1483, but Queen Catherine (of Aragon) received her supplies from France. They were then expensive luxuries and with the ladies of this period "Pin money" (hence the term of the present day) was a consideration.

An Act of 1543 prohibited the sale of pins unless "double headed" or with "heads fast soldered to the shank." France held the trade until 1626, when Tilsby introduced the manufacture into Stroud in Gloucestershire. The trade spread to London, Bristol and Birmingham in 1636, but it was not until 1817 a machine was patented for making the head, shaft and point in one piece.

The weekly output of pins, principally made in Birmingham, is computed at 500,000,000!

With the ordinary pin we have but little to do, but we can show you

[illegible]ense of proportion, and does not understand moderation. When water is plentiful he pours it on his fields, with the result that the plants wither away and rot owing to the rise of the water-table. The great fear now is that the fellah will rush to put the extra water now available on the fields, and so the Government has issued a strongly-worded circular to the farmers' warning them of the danger of overwatering, especially at the present stage.

The months of September and October are also critical because of the danger of boll-worm attacks. Last year it may be remembered that the crop right up to late in the season promised to be eight million one—the Government's estimate, which is always compiled most carefully, placed it at over that figure—and then, with a sudden jump, the estimate had to be reduced by half a million cantars, purely and simply because the boll-worm's attacks had spread over such a wide area. So far, cotton worm has done little damage—even in Belsora, where worms were plentiful, the plants suffered scarcely at all owing to the excellence of the super- boll-worm is reported, though small scale, from all the

should not have any claim to
given any of the highest posts in the
postal service. "It cannot be urged
too strongly," says the memorialists,
"that it would be most unfair to give
any of these posts to members of the
Telegraph Department." A further
resolution on the same subject says
that in view of the amalgamation of
the Post Office with the Telegraph
Department, it is apprehended that
the opportunities of postal officials will
not be interfered with in any way.

OTHER POINTS.

Many other minor points are dealt
with in the report of which one refers
to the desirability of the encourage-
ment of the study of tribal languages
in India by Superintendents, who if
they pass examinations in these lan-
guages, should earn rewards for their
enterprise. It is also held that the
minimum period of training for pro-
bationary Superintendents should be
one year and the maximum two years,
while non-domiciled Europeans select-
ed for the Superintendents cadre
should be graded with probationary
Superintendents, as regards scope of
pay. Travelling allowance is dealt
with in the memorandum which con-
tains lengthy reasons for the passing
of the resolutions.

Police, and Haji [illegible] have been com-
mitted by Mr. [illegible] Presidency Magistrate

ed University and that non-
under-graduates, both classes being at
the same time men of good social
standing, lastly, that first-class post-
masters should be recruited from
postal officials subject to the condition
that they pass the departmental exa-
mination, and that there be no re-
striction to the age at which they are
expected or allowed to go up for the
examination. This last section of
the resolution or recruitment, it will
be seen, is framed with the object of
making ability for the post, the chief
qualification and inculcates a praise-
worthy desire that a man's position in
the service should not debar him from
advancement into higher grades.

CONDITIONS OF SALARY.

Amongst other resolutions perhaps
one of the most important in the
memorandum is that which relates to
conditions of salary and the question
has been gone into in detail. The reso-
lution suggests that the pay of a pro-
bationary superintendent be fixed at
Rs. 150 for the first year and Rs. 200
for successive years. The pay of
superintendents has been suggested
on the following graded scale:—

Grade	Appointments	Salary in Rupees
1st	20	750 to 850
2nd	25	600 to 700
3rd	40	450 to 550
4th	50	300 to 400
5th	37	250 (fixed).

In the event of the Government be-
ing unable to accept this proposal or
to sanction the number of appoint-
ments specified in each grade the me-
morandum brings forward an alterna-
tive proposal by which superintend-
ents should start at a salary of Rs. 300
per mensem and receive increments of
roughly Rs. 25 for each year of ser-
vice, until after a period of twenty-
two years they would be in receipt of
a salary of Rs. 900.

N MURDER.

USED'S STORY OF CRIME.

RD'S ARREST EXPLAINED.

ACTS ALLEGATIONS.

NIES KNOWLEDGE OF MURDER.

(Associated Press.)

ALLAHABAD, Sept. 30.

hong the papers in connection with trial of Mochi Sukkhu who has committed to the Sessions on a ge of murdering Miss Murphy, are ous statements made by the used.

On the 4th September the accused ade the following statement before r. Cotton, the Magistrate:—I left orakhpur yesterday evening at 7 p.m. the evening train to go to Basti. and a certain Mohan came on the ame ekka to Gorakhpur station. I new Mohan before. He was a porter. Mohan said that he was going to Gonda. I gave a cigarette to Mohan and smoked one myself. I and Mohan sat in the same compartment. There were two or four other men whom I did not know in the compartment. I had with me a dhoti, a pair of shoes and a lota and no other proptrty. It had become dark at Gorakhpur and the carriages were lit up. The carriage of the guard was five or six carriages behind my carriage. There was a zenana carriage in front of my carriage and in front of the zenana carriage was seated the memsahib. I saw the guard pass along the footboard in front of my carriage carrying a lantern and proceeding in the direction of the carriage containing the memsahib. I did not go with the guard. I looked after the guard out of the window. Mohan was asleep and did not look out. Nobody else took any notice.

GUARD'S MOVEMENTS.

I did not know the guard before and I do not know his name. Then I saw the guard begin to enter the carriage in which the memsahib was. She cried out to him in English. Then the guard stopped trying to get into the carriage and returned along the footboard. Then the train arrived at Mindarwa and there the guard looked into the carrige where the memsahib was and then sat down in his own carriage as the train started. As the train passed Mindarwa distant signal the guard again came along the footboard with his lantern. I suppose he thought that the memsahib was asleep. Then the guard opened the door and the memsahib cried out and the train went a little further and the guard came back along the footboard and returned to his own brakevan. The train arrived at Basti. In Basti I got out to smoke a cigarette. I left my lota, dhoti and shoes inside the carriage. I decided I would not go out as I wanted to see what the guard was doing. The train left Basti. After we had passed the distant signal, the guard came along the footboard without the lamp and went towards the carriage of the memsahib. The mem sahib was asleep at the edge of the window. I had seen this in Basti and so had the constable. The guard went inside the carriage of the memsahib.

A RED BLANKET.

Then the engine whistled and the guard came back along the footboard and left a red blanket under the seat of my own carriages as he passed. I did not make any objection to this out of fear. Then we arrived at a station of which I do not know the name. As the blanket was placed in my carirage by the guard these four pieces of broken bangle fell on my foot. Then I picked up the four pieces of bangle and tied them up in a corner of my dhoti. I then became afraid. I did not say anything to Mohan. I left my own carriage and went to another carriage in front of the carriage of the memsahib and two carriages off. I did not take the red blanket with me. I took the pieces of the bangle. I left behind my own dhoti, my shoes and my lota. Then I went on with the train to another station. There though fear, I got out of the train and crept out of the station into the Dalan and went to sleep. Then the train arrived from Gonda. I had no time to buy a ticket, so I got into the train without a ticket. As I arrived at the next station I got out and say that a sahib and Daroga were examining every carriage in the train. I went towards the saheb but said nothing through fear. Then I got back into the train.

WHY THE GUARD WAS ARRESTED

Sukhu then described his arrest. It was a result of this statement of Sukkhu's the guard of train was put under arrest, but in another statement recorded by Mr. Troup, Superintendent of Police, on the 11th September, Sukkhu retracted his allegations and the guard was exonerated.

On this occasion Sukkhu said "I got into the Basti train. Nothing happened in the Basti train. I knew nothing for four days. I sat down in a third class immediately after the female compartment. I have never seen this shoe in my life before. I do not know anything about the kookri etc., or what I said to the Collector."

A summary of Sukkhu's statement in Court on September, 26th, has already appeared. He denied that most of articles rescovered by the police were his, but claimed the dhoti which had been, lent to him by the constable when his own was sent to the chemical examiner. He admitted possession of a zenana dhoti he was wearing when arrested. blood-stains on it were caused by his father's bleeding in the assault case before the murder. He said he made his statements against the guard at the instigation of the police. He alleged that the police made him drunk and beat him and that they had pieces of the bangle before they professed to find them in his possession. He now denied all knowledge of the murder.

WASHINGTON, Sept. 30.

In that case the Bill will go to the Senate on Wednesday, where it is expected to pass with equal expedition. Duties are lower on an average than those either of the House or Senate Bills. If the Bill is ratified as it stands, it will provide a surplus revenue of sixteen million dollars in the first year and eighteen millions in the following years. The Bill will become effective as soon as the President signs it, except as regards free, raw wool, which is deferred till December.

(Associated Press.)

MADRAS, Sept. 30.

At the Madras High Court, before the Chief Justice and Mr. Justice Oldfield, the hearing of Mrs. Besant's appeal against Mr. Justice Bakewell's judgment, in the suit brought by Mr. G. Narayaniah for the recovery of his minor sons, was resumed to-day.

Mrs. Besant resumed her arguments. She took up the question of an alleged undertaking by her to keep the boys separated altogether and absolutely from Mr. Leadbeater. She referred to a note made by her immediately after her interview with the plaintiff, a letter written by her to Mr. Wadia, and the evidence by herself and her witnesses relating to the interview; and contended that no undertaking could be found anywhere, and that on the other hand the uncontradicted testimony of her witnesses proved the non-existence of any.

HINDU TEMPLE FOR UMARKHADI.

On Saturday night a public meeting of the Hindu ratepayers and residents of Umarkhadi, was held in the hall of Mr. R. N. Chavan's residence, when Mr. A. N. Surve was voted to the chair. Several speakers addressed the meeting to the effect that the Hindu community of that locality felt the great want of a place for religious worship. Though several thousands of Hindu people resided in this locality, there was not a single temple in it. This want greatly hampered them in their devotions. It was unanimously agreed that steps should be taken towards meeting this want, and a representative committee was appointed to obtain a vacant piece of municipal ground in Umarkhadi from the municipal authorities. The proceedings terminated after the usual votes of thanks.

SECRETS OF THE AIR.

ORGANIZED RESEARCH AT AGRA.

(From our Correspondent).

SIMLA, Sept. 30.

The Metrological Department has been considering the question of observations of the upper air. At the instance of the Royal Society this branch of scientific research has received a fresh impulse and the hope is now entertained that more will be accomplished in this direction in the near future than has been possible in the past.

Sanction has been given for a scheme under which Mr. J. H. Field with the assistance of Mr. W. A. Harwood, will embark on a series of investigations which is calculated to extend over a period of ten years.

The headquarters of the work will be at Agra, where it is proposed to send balloons fitted with recording apparatus about twice weekly to as great a height as can be reached; and there will probably be four or five sub-stations from which, as well as from Agra, balloons carrying apparatus will be sent up several times a week to more moderate heights.

Pending the construction of the necessary buildings at Agra research must necessarily be restricted to the reduction and discussion of data previously collected and to work with pilot balloons.

SLAVERY ON TRAVANCORE ESTATES.

JUDGE'S STRONG INDICTMENT.

(ASSOCIATED PRESS.)

MADRAS, Sept. 30.

The Sessions Judge of Kottayam, Travancore, spoke very strongly, in a case of kidnapping the other day, on what he described as conditions of slavery which were found to exist on some of the estates in the Travancore highlands.

He said that there was an impression abroad that a slave traffic was carried on with impunity there, and that, once attached to an estate as a coolie, the defenceless creature was deprived of all individuality and treated as a chattel.

The arm of the law was, he said, not strong or long enough to reach the worst offenders.
